

Redco™ FRP Wall Panels

Maintenance Free, Textured Wall Panelling

Redco™ FRP textured wall panels are ideal for food processing plants, hospitals, restaurants, even car washes. FRP sheet is easy to clean and keeps drywall from getting wet and damaged, preventing any mold or fungus growth in wet environments.

They are easy to install over existing wall materials such as drywall or concrete – resulting in a waterproof installation once the joints and seams have been sealed with caulking and moldings. The textured surface provides protection from abrasion and denting, keeping it looking new for years after installation.

Redco™ FRP is a glass fiber laminate that is lightweight, strong, and shatter-resistant with excellent physical properties. It is commonly used as wall and ceiling panels.

American FDA and Canada Agri-Food Approved for direct food contact.

- **Easy to Install**
- **Maintenance Free**
- **Lightweight**
- **Waterproof Installation**
- **Abrasion Resistant**
- **FDA Approved**
