# Shovel Solutions

Making Preventative Maintenance  
Easier, Safer & More Cost Effective

## Redco Shovel Solutions

Lighter than aluminum and longer lasting than rubber and wood - Redco Plastics are engineered for the toughest applications such as:

**Redco Urethane Shovel Bumpers and Door Bumpers**, which have been developed to protect costly equipment and increase safety. They have an excellent “memory”, rebounding to their original shape for longer wear life.

**Redco Dipper Door Blocks** are used during maintenance, propping open the door and keeping workers safe from entrapment.

**REDWOOD  
PLASTICS**

INNOVATIVE SOLUTIONS IN PLASTIC
