

Redco™ Curb Cover

Reduce Street Curb and Transit Curb Damage

BEFORE

AFTER

- **UV Stabilized**
Will not degrade in the sun
- **Exceptional Impact Resistance**
Reduces damage to bus wheels and tires
- **High Visibility**
Supplied in hi-viz yellow
- **Slick Surface**
Low co-efficient of friction

Redco™ CURB COVER is a virtually unbreakable bumper system that eliminates damage to concrete curbs and bus tires at transit stations. Redco™ CURB COVER permits buses to pull up to the curb safely and puts an end to concrete spalling and tire and wheel damage, significantly reducing maintenance costs.

The Redco™ CURB COVER synthetic material has a very low co-efficient of friction while also having excellent impact strength. The tires will simply deflect and glide smoothly along the curb face. Different profiles and configurations are available for easy installation. Custom UV stabilized colors and custom fabrication options are available.

Stop painting, replacing and repaving – switch to Redco™ CURB COVER.
