

Non-Slip, No Slide Safety First

Flooring, Matting, Stairs
and Platforms for
Sure-Footed Surfaces.

NFPA & OSHA (COF)* Approved

For safety's sake, use Redco™ Turtle Tiles® on any surface where drainage and traction are essential. Made of recycled plastic, these durable interlocking tiles convert to any size area.

Redco™ Turtle Tiles® are slip resistant, easily cleaned, and can mount to nearly any existing floor, stairway, or platform, indoors or out, with easy installation.

The use of slip resistant tiles not only provide a safer environment but will also cover the most unsightly and dangerous cracks on pool decks, entrances, rooftops, workout areas, ADA ramps, outside halls, laundry rooms, and vending areas.

Redco™ Turtle Tiles® can also be used in storage racks and inside compartments within fire trucks and emergency vehicles to prevent items from shifting. The absorbent tiles will also absorb any shock, preventing damage to the vehicle.

- Slip resistant, grit top available.
- Tile Sizes: 12" x 12" | 24" x 24" | 36" x 36"
- Thicknesses: 1/4", 1/2", and 3/4"
(sizes/thicknesses availability dependent on tile type)
- 2' x 2' - 3' x 9' Mats Available
- Sonic welding available for custom larger mats.
- Redco™ ezMat® can be custom cut for your compartment.
