

Prevent Leakages with P-Seals

Redwood manufactures a variety of bulb or "P" seals that are designed to keep water, dust or other contaminants out of certain areas in your equipment or machinery.

Our P-seals are engineered to be embedded in areas with high compression to cover gaps, block dust and reduce heat loss. We make our seals from resilient, heat-resistant elastomer materials to provide long-lasting protection in kiln and oven applications.

Custom sizes and shapes are available following your requirements and project needs.

Common Applications

- Door Seals
- Window Seals
- Hatch Seals
- Cable Protection
- Vehicle Panel Piping
- Interior & Exterior Applications
- Oven Gaskets
