

SAFEGUARD YOUR SHAKER SCREENS

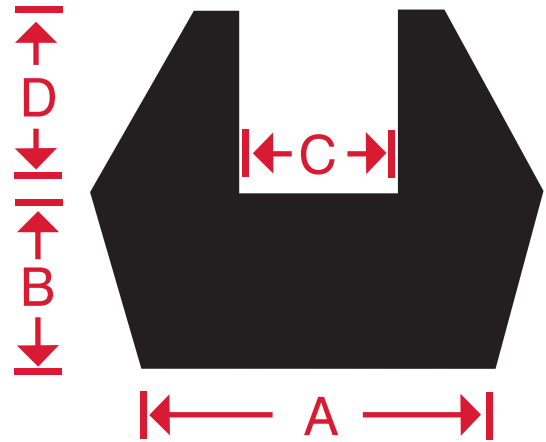

Our Shaker Screens Channels protect shaker screens from metal-on-metal wear and can absorb impact and shock from residuals travelling down the screen. Most of our shaker screens are SBR rubber.

All dimensions and tolerances are based on RMA E-3.

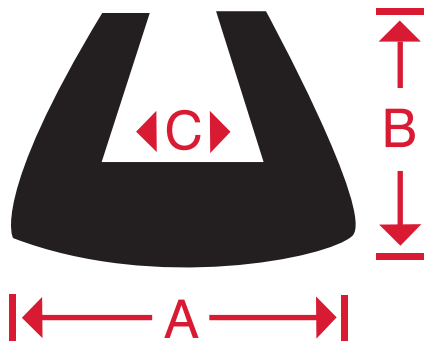

The dimensions below are **NOT absolute** and can slightly vary depending on a variety of factors. Dies may have to be custom built to obtain a specific dimension for a required durometer and compound. Please contact our sales department for more exact specifications.
