

## OIL & GAS

PREMIUM SOLUTIONS FOR OPTIMAL LIFE

Oil & Gas production and operations are incredibly grueling to both equipment and machinery. Without diligent maintenance schedules, equipment or machinery can break resulting in massive downtime that could cost budgets to balloon by the millions.

For over 50 years, Redwood Plastics and Rubber has crafted custom solutions that improve safe operations and assist in the mitigation of wear, abrasion, conductivity and noise issues within operations. We are credited in extending the equipment life of walkways, truck beds, cables and more.

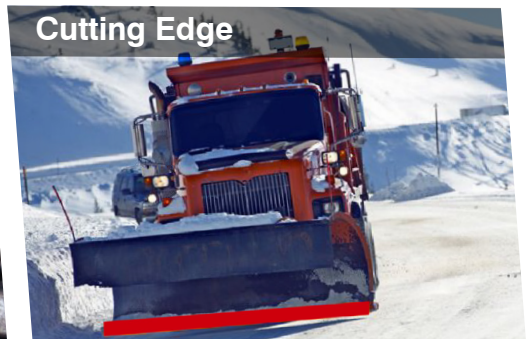

FRP Grating & Walkways

Nylon Sheaves & Pulleys

Cutting Edge

Crossover Pads

Forklift Socks

Outrigger Pads

North America **1.833.381.1195**

Fully equipped with the latest technology, our facilities can manufacture plastic and rubber solutions to almost any specification.

- UHMW, Nylon, Acetal, PTFE, Phenolic, and more
- Cast Urethane
- Rubber Sheet
- CNC Machine Plastics
- Molded Rubber
- Large stock shape inventory
- In-house design and mold making
- Reps for site visits available
- QA team inspection
- Advanced pre-production scheduling
- Batch ordering available

## CASE STUDY

### Redco™ 60D Urethane Rollers

Urethane rollers are used by our customer to rotate customized and heavy pressure containers like this storage tank.

Heat from these containers, combined with its incredible weight, deteriorated our customer's urethane rollers quickly and significantly. They wanted to find an alternative that would perform better that would reduce maintenance.

We quickly investigated and found a new grade of urethane with both impeccable heat and weight resistance. Our customer was happy with the alternative and ordered 22 more rollers with the new material.
