
REDWOOD PLASTICS AND RUBBER

Redco™ Rollers

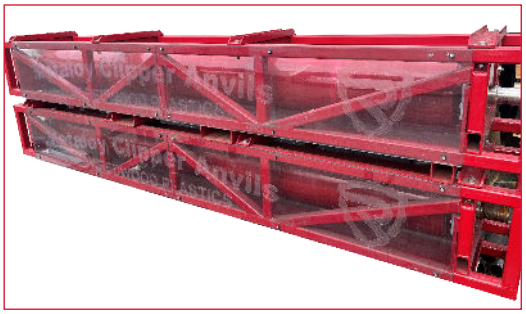
With decades of experience and outstanding manufacturing capabilities, we redefine what it means to produce and service exceptional rubber rollers across industries, from sawmills to food packaging plants. We can recoat your existing pulleys with new rubber or urethane coatings and provide brand-new steel cores with new urethane or rubber coatings.

Redco™ Rollers are available in a wide range of materials; we also offer material matching, spec'ing, and reverse engineering of current rollers. Contact our expert team today to find the best solution for your issue.

Add-ons include: grooving, crowning, ceramics, crates, shaft and core repairs, non-destructive testing and dynamic balancing.

Compound development and reverse engineering available upon request

We offer recoating services for your existing Clipper Anvil Rollers



We are proud to offer our Redco-a-Roller Rental Program for our Clipper Anvil Rollers!
